

Burger's

Medicinal Chemistry, Drug Discovery and Development

EIGHTH EDITION, 8-VOLUME SET

Donald J. Abraham (Editor-in-Chief) & Michael Myers (Consulting Editor)

Chemistry/ Pharmaceutical & Medicinal Chemistry/
Drug Discovery & Development

This flagship reference for medicinal chemists and pharmaceutical professionals has been thoroughly updated and expanded to incorporate the concepts of drug hunting along with its existing coverage of the entire process of drug discovery and development.

Bringing in a new and expert editorial board, this new edition updates existing chapters and adds new ones, with topics including: opioid addiction treatments, antibody and gene therapy for cancer, blood-brain barrier, HIV treatments, and industrial-academic collaboration structures.

- Continues the legacy of an established, recognized, authoritative, and comprehensive source of information on medicinal chemistry and drug discovery and development
- Features thematic volumes or sections on drug discovery, drug development, cardiovascular diseases, metabolic diseases, immunology, cancer, anti-infectives, and CNS disorders
- Updates existing chapters and adds 35 new ones, incorporating the concepts of drug hunting

TARGET AUDIENCE

- Research departments in the pharmaceutical and biotechnology industry
- Biomedical Research Institutes, Medical, Pharmaceutical, and Veterinarian Schools, Libraries, and Consultants
- Readers from Graduate Students to Professional Bioengineers, Biologists, Chemists, and Medical Researchers with an emphasis on Medicinal and Clinical Chemists
