

# Consequences & Lessons from the Pandemic

**Žižek analyses the nature and consequences of the pandemic that is engulfing us all.**

- It is written by one of the most well-known and widely read philosophers and cultural critics in the world today
- Written with Žižek's customary brio and love of paradoxes and analogies in popular culture, this book explores the topsy-turvy world of life under lockdown, when the greatest act of love is to stay away from the object of your affection
- Žižek argues that the massive interventions in the economy by many states and the revaluation of the kind of work that is being done by health workers and others on the frontline are developments that carry far-reaching consequences, pointing to the possibility of a new form of society emerging out of an unprecedented crisis in the heartlands of western capitalism

**A world-leading authority on medicine and public health provides a hard-hitting account of why we were so poorly prepared for the pandemic and what lessons we need to learn for the future.**

- Horton is Editor-in-Chief of the leading medical journal The Lancet and is a world-leading authority on medicine and public health
- In this short, hard-hitting book, Horton argues that governments and their scientific advisors across the world underestimated the dangers of coronavirus and failed to prepare adequately for the pandemic, despite decades of warning from experts
- With the current pandemic nowhere near over and the next one likely just over the horizon, Horton then turns towards the future and outlines the measures that must be taken to prevent another pandemic of this kind
