Alan Manning

Immigration policy will never satisfy everyone. It's a stubborn fact that more people will want to move to high-income countries than residents will want to admit. But, as Alan Manning – former head of Britain's Migration Advisory Committee – makes clear, that doesn't mean we can't do much better.

But, as Andrea Capussela argues in this highly original combination of philosophy and economics, that is not all: it also makes us less prosperous.

True freedom, Capussela writes, arises when no one is subject to another's will, be that the will of an employer, Big Tech, or the so-called elite. A citizen who is free in this

highly original combination of philosophy and economics, that is not all: it also makes us less prosperous.

**Gender and Technology: An Introduction**

Holly Kruse

Technology has advanced significantly over the past 200 years, but have ideas about gender and technology also changed over time? Are modern technologies gendered?

In this comprehensive text, Holly Kruse explores how notions of gender and technology have been socially constructed. Organized historically, the book provides a sweeping overview of global developments in technology and how these technologies have been (ideologically) gendered. Focusing on communication and media technologies and analysing an array of household and workplace technologies the text examines the ways in which these technologies have shaped and been shaped by gender.

Their names are Mohamed, Samira, sometimes Matthieu or Sophie. They were born and bred in many parts of France and are highly qualified, but they have decided to go and live in London, New York, Montreal, Brussels, Geneva or Dubai. Many were discriminated against on the French job market, or stigmatised because they have the wrong religion or wrong-sounding names. Whether devout Muslims or not, they felt unloved and unwanted in France, and they find outside of France a sense of peace and fulfilment their native country would not give them. Outside of France they enjoy a 'right to indifference'...

**The Dark Forest Theory of the Internet**

Bogna Konior

*The Dark Forest Theory of the Internet* investigates how intelligence—human and artificial—manifests under conditions of secrecy, hostility, and concealment.

Departing from Chinese science fiction writer Liu Cixin's dark forest theory—which frames the universe as a hostile terrain filled with predators, where transparent communication is foolish and dangerous—the book portrays the internet as a cosmic war machine, teeming with existential tension, nascent AI cults, and deceptive superintelligences. It maps a digital world in which deception is safety, silence is strategy, and new forms of intelligence are emerging.

**The Curse of Empire: Ukraine, Poland, and the Fatal Paths in Russian History**

Martin Schulze Wessel, Neil Solomon

Russia's attack on Ukraine marks an epochal break in European and global history. Undoubtedly, the decision to go to war is closely linked to one person, Vladimir Putin, but Russia's war is not driven solely by one man's power calculations. We can only make sense of Russia's actions in Ukraine, argues the distinguished historian Martin Schulze Wessel, by putting them in the broader context of the history of Russian imperialism and the influence it continues to exert today.

Schulze Wessel argues that Russian imperialism was shaped by Russia's relationship to Poland and Ukraine.

### Choruses and Counter-Choruses: Culture and Politics in Brazil, 2013 - 2023

Flora Sussekind, Sergio Delgado Moya

In this book, the leading Brazilian cultural theorist Flora Sussekind analyses the turbulent recent history of Brazil. She examines the protests which erupted in Brazil in 2013 and the ways that these were appropriated by the extreme right, and she shows how these developments expressed a break from and threat to the democratic orientation and social pact represented by the 1988 constitution, a collective achievement after decades of dictatorship. She also shows how these events contributed and pointed to the rise of a culture of intolerance, bringing this to bear upon literary and artistic

Alain Badiou, Robin Mackay

In this book, the renowned philosopher and polymath Alain Badiou tells the story of the first five decades of his life, from 1937 to 1985, setting it within the political history of the twentieth century.

### West Asia: A New American Grand Strategy in the Middle East

Mohammed Soliman

At the end of the 20th century, the United States birthed a new Middle East order built on realpolitik and a stable balance of power. Three decades later that order has been destroyed. America's disastrous invasion of Iraq along with the failed Arab Spring created a vacuum that has allowed revisionist powers to extend their influence across the region.

In this groundbreaking work, renowned global strategist Mohammed Soliman argues that it is time for the United States to move beyond unsuccessful nation-building and

### The Rise of Dogwhistle Politics

Deborah Cameron

The term dogwhistle, meaning a political message with a hidden or coded meaning, only entered mainstream usage in the mid-1990s, but today it seems to be everywhere. Accusations of dogwhistling fly in every political direction, and the meaning of the term has broadened to encompass an ever-expanding range of words, images, actions and objects.

This book investigates the rise of the dogwhistle as a key cultural and political reference point, arguing that it's a sign of our political times. It's related both to the polarized nature of politics in the era of populism, culture wars and

### Post-Liberalism

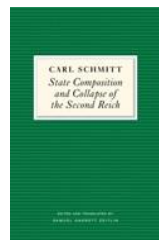

Matt Sleat

Liberalism has long been the dominant ideology of the modern west. In recent years, however, post-liberalism has emerged as a central movement within the 'New Right' and a formidable intellectual challenge to the mainstream. Notably, even American Vice-President J. D. Vance has described himself as of the 'post-liberal right'.

Matt Sleat presents the first comprehensive and critical analysis of the post-liberal movement. He explores post-liberalism's theological roots in integralism and Radical Orthodoxy, as well as its connection to comparable movements such as National Conservatism. Drawing...

### Elect Women for a Change: The Path to Gender Parity in Politics

Mona Lena Krook

Over the last three decades, women have made significant inroads into political life. Yet the equal and inclusive sharing of political power remains elusive. The number of women in political positions still falls short of full equality, and even when women enter politics, they often continue to be marginalized and do not reflect the full diversity of women as a group.

Written by a leading authority on women and politics, this incisive book makes the case for gender parity and identifies strategies to achieve it. Offering a roadmap for

Robert L. Reece

Colorism – discrimination based on skin darkness within a racial group – has plagued Black Americans since their first arrival in this country.
