Profit: An Environmental History

Mark Stoll

Profit — getting more out of something than you put into it — is the original genius of homo sapiens, who learned how to unleash the energy stored in wood, exploit the land, and refashion ecosystems. As civilization developed, we found more and more ways of extracting surplus value from the earth, often deploying brutally effective methods to discipline people to do the work needed.

Historian Mark Stoll explains how capitalism supercharged this process and traces its many environmental consequences. The financial innovations of medieval Italy created trade networks that, with the European disc...

Interventions 2020

Michel Houellebecq

The death of God in the West was the prelude to a formidable metaphysical soap opera that continues to this day. Christianity's masterstroke was to combine a fierce belief in the individual with the promise of eternal participation in the Absolute. When that dream evaporated, various attempts were made to offer the individual a minimum of being. The latest of these attempts is advertising, which seeks to arouse desire and transform the subject into a docile phantom doomed to follow advertising's every whim. But, like all previous attempts, this skin-deep, superficial participation in the world...

Li explores the philosophical origins of the concept of *self* in both cultures and synthesizes her findings with cutting-edge psychological research to reveal a fundamental contrast.

Westerners tend to think of the self as *being*, as a stable entity fixed in time and place. East Asians think of the self as relational and embedded in a process of *becoming*. The

The Working Sovereign: Labour and Democratic Citizenship

Axel Honneth, Daniel Steurer

What role does the organisation of labour relations play in the health of a democratic society? Axel Honneth's major new work is devoted to answering this question. His central thesis is that participation in democratic will formation can only proceed from a transparent and fairly regulated division of labour.

The social world of work – where we spend so much of our time – is almost unique in being a space in which we have experiences and learn lessons that we can use to influence the attitudes of a political community. Therefore,
